

Solar flex pipe

Solderless and cost-efficient joining technique of stainless steel

Easy to install

Long term consistent

Space saving

Reliable

- **Optimal for the connection of solar systems and for many more appliances in the building equipment**
- **Solderless installation: easy and quick handling without special tools.**
- **Cost-efficient and save laying.**
- **Achievable in rings up to 40m as single pipe or 20m as 2 in 1 pipe .**
- **Insulation made of UV-resistant, CFC-free, synthetic rubber.**

Technical data

Material

Stainless steel 1.4404

Nominal size

DN 15, DN 20 and DN 25

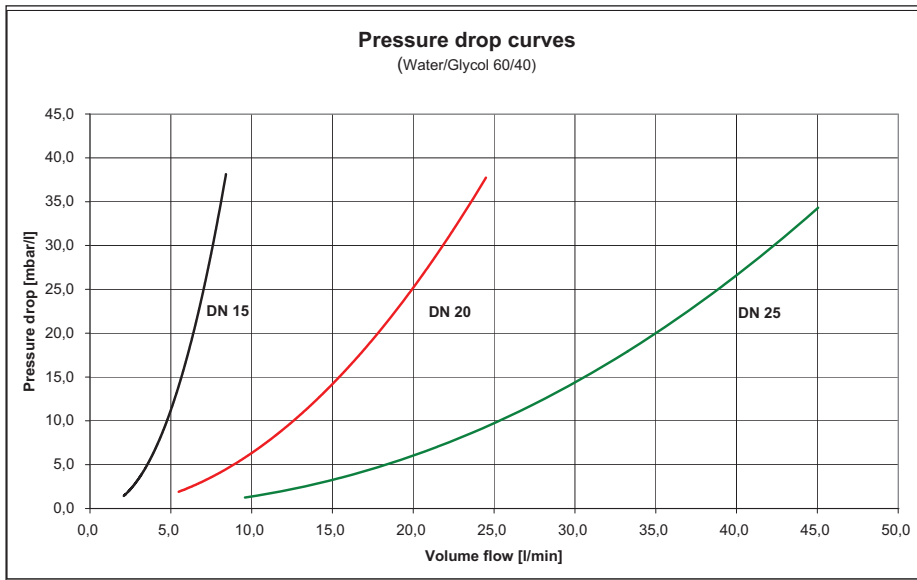

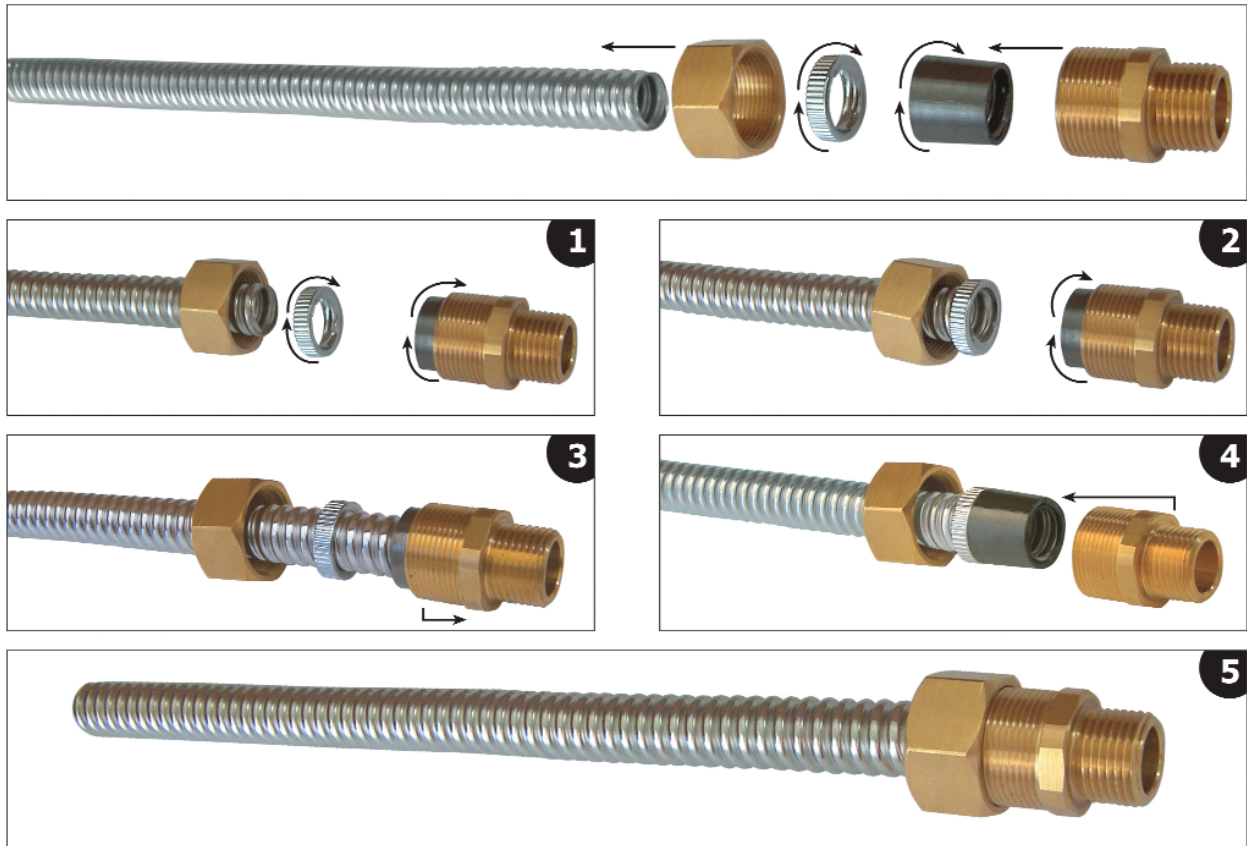

Insulation

Tube insulation made of synthetic rubber, CFC-free, UV-resistant and weatherproof, coated with black PE-protection foil

Heat conductivity

0.040 W/mK

So easy it works.
